

Patient Monitor

P22/P18/P15/P12

reddot design award
winner 2021

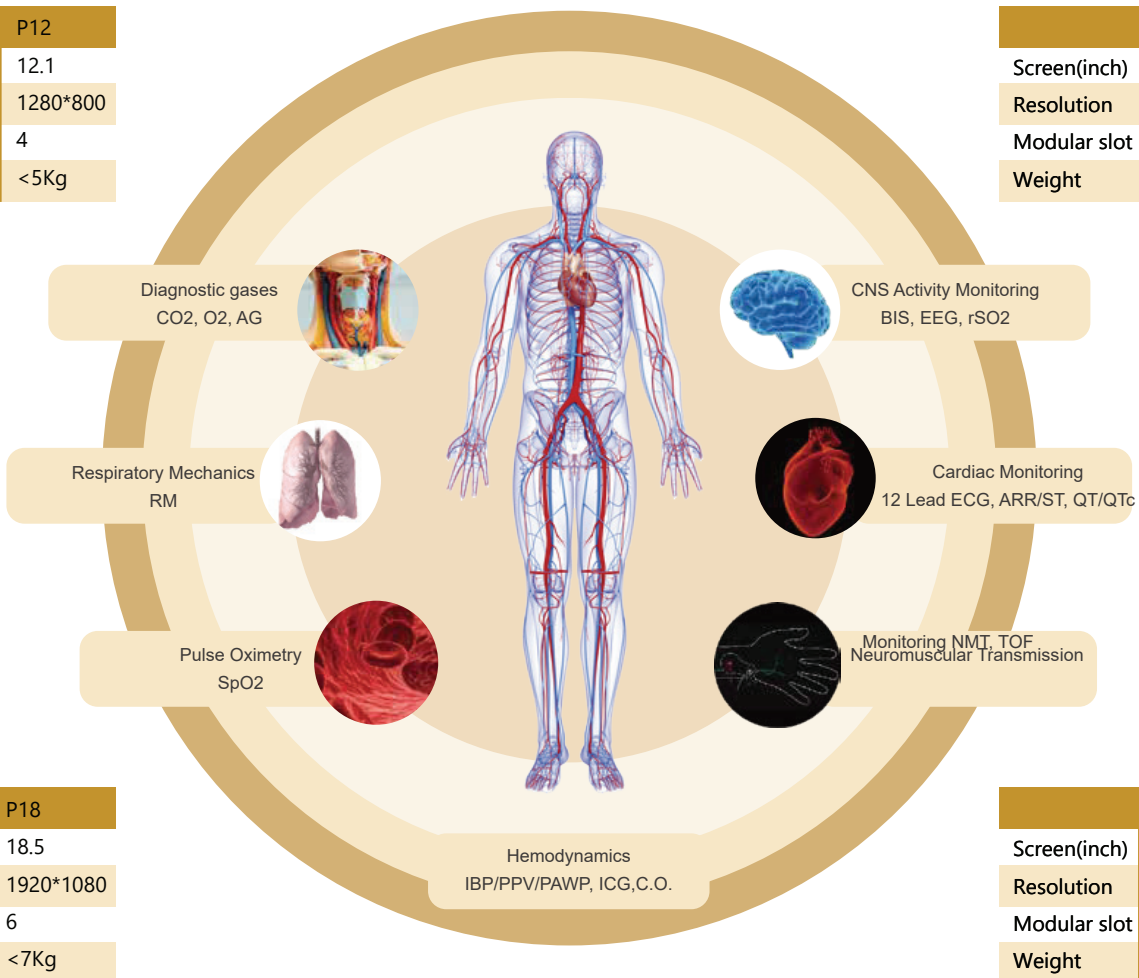

Powerful | Pioneer | Practical

Monitoring parameters of all vital organs

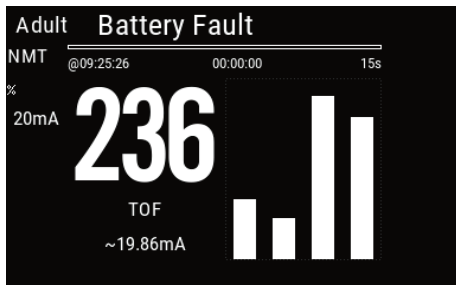

P12	
Screen(inch)	12.1
Resolution	1280*800
Modular slot	4
Weight	<5Kg

P15	
Screen(inch)	15.6
Resolution	1920*1080
Modular slot	6
Weight	<6Kg

P18	
Screen(inch)	18.5
Resolution	1920*1080
Modular slot	6
Weight	<7Kg

P22	
Screen(inch)	22
Resolution	1920*1080
Modular slot	6
Weight	<8Kg

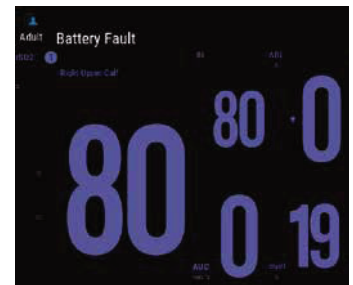

NMT (Neuromuscular transmission)

NMT helps in determining the depth or neuro cerebral perfusion.

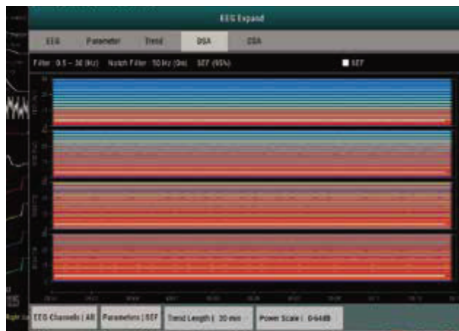

BIS (bispectral index)

Used to determine the depth of sedation or hypnosis.

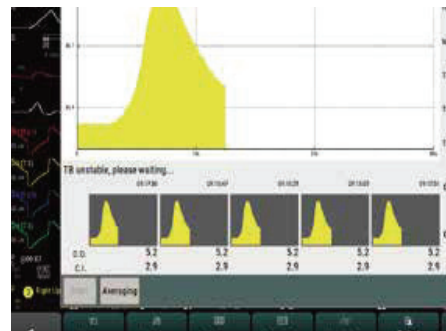

rSO2 (regional oxygen saturation)

a non-invasive method of directly measuring cerebral perfusion.

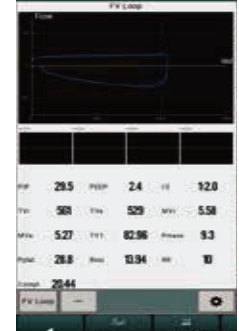

EEG (electroencephalography)

Used to determine changes in brain activity that assist in cerebral perfusion.

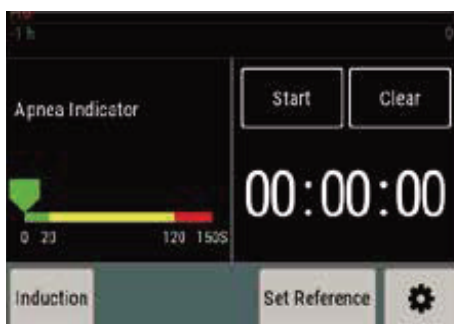

C.O. (Cardiac Output)

A gold standard to monitor the critically ill patient to ensure tissue oxygenation.

RM (respiratory mechanics)

Help understand the ventilator/anesthesia machine operation and patient's respiratory function.

BOA (Balance of Anesthesia)

Focus on relevant parameters over the course of the surgery.

Sepsis View

Help to score and guide the treatment of sepsis based on the latest SSC guidelines.
