Material

The chassis cover is made of high quality Ni-Cr stainless alloy steel by seamless robot welding, corrosion resistance, disinfection resistance, rust-proof and durable.

**Mattress**

Removable memory mattress, good rebound resilience, anti-static electricity and anti-microbial.

**Control System**

Electro-hydraulic control system, non-gear structure, all functions are controlled by the hand controller.

**Braking system**

Mechanical brake device at the side of the base, with fixed or moving function, flexible and reliable.

**Hand controller**

All functions are controlled by the hand controller.

**Kidney bridge**

Kidney bridge is adjusted by the hand wheel at the side of head board, more convenient, with separate mattress.

**Battery could support**

Battery could support about 50-80 complete operation cycles. Working time could be last for one week according to useage and help to keep the operating table running in the event of power failure.

**Horizontal movement**

300mm horizontal movement function, with high strength phenolic resin table top, could be used for X-ray and C-arm.

**Leg plate**

The up and down folding of the leg plate is manually controlled by the high strength gear, which makes the operation more effort-saving and smooth.
