Material

The basement is made of ultra-thick high-quality 304 stainless steel, seamlessly welded by robotic welding technology, with modern appearance and stability.

Mattress

Base is made of Q235 board, with 304 stainless steel cover which is anti-corrosion and easy to clean.

Head Section

The head section is raised and lowered by gas spring.

Kidney Bridge

Manual kidney bridge operated by head side rocker, more convenient to operate.

Horizontal sliding

Extra transverse slide distance 400mm with the high-strength phenolic resin tabletop, compatible with X-ray and C-arm, and has no blind spots.

Hand Controller

Dual control system. All functions controlled by both hand controller and control panel on table base column, both with the lock to prevent accidental touch.

Leg Section

The detachable leg section is raised and lowered by gas spring. Easy and effortless to operate.

Brake Pedal

Mechanical pedal brake design, easy to move and lock.

Battery

The operating table is equipped with a standard battery, which can provide about 80-120 complete operating cycles when fully charged. It can be used for about one week depending on usage and help to keep the operating table running in the event of power failure.

Anesthesia screen frame

Equipped with a stainless steel anesthesia screen frame for hanging anesthesia curtains, used to shield and cover the patient's head during use.

Shoulder support

Polyurethane support frame, adjustable in angle, used to stabilize the patient's body.

Body support

Polyurethane support frame, adjustable in angle, used to stabilize the patient's body.

Arm rest

Polyurethane widened armrest board with attached straps, providing stable performance and versatile applications.

Leg rest

Manual multi-angle adjustment for easy use.
