Healthier your life

STOCK CODE: 870098

SK-PB018

SPINAL THERAPY BED

SK-PB018

FEATURES AND HIGHLIGHTS

Technical parameters

▪ Bed Body Dimensions (mm)	L1800*W550*H530
▪ Extended Ankle Cushion Dimensions (mm)	150
▪ Mattress Thickness (mm)	80
▪ Load-Bearing Capacity(kg)	200
▪ Product Net Weight(kg)	60
▪ Drop Function Areas	lumbar spine/pelvis/legs

Design

Ergonomic design with three-stage pressure design. It is carefully designed to fit different parts of the body and varying pressure points, conforming to the body's curves. Simple and elegant, stable and reliable, in a black color scheme, visually appealing and durable.

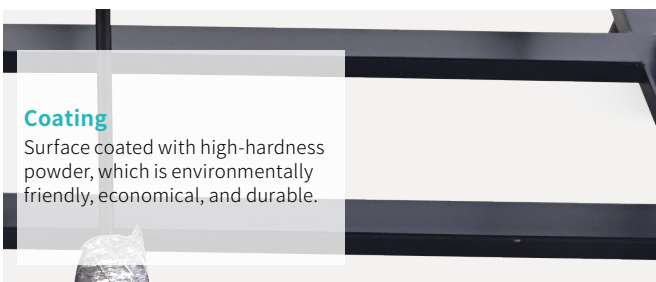

Base

Selected high-quality Baosteel from Fortune Global 500 with specifications of 40*40mm, 40*80mm, and 25*50mm respectively, with a wall thickness of 1.5mm. Manually welded in one piece, with smooth weld seams, capable of bearing up to 200 kilograms.

Coating

Surface coated with high-hardness powder, which is environmentally friendly, economical, and durable.

Bed surface

The bed surface is made of high-quality PU leather that is stain-resistant, flame-retardant, and mildew-proof, with high density sponge with a thickness of up to 8cm. It features a multi-layer board base. The middle of the thoracic section of the bed surface is hollowed out, making it more suitable for women. Available bed surface colors: black, blue, and red.

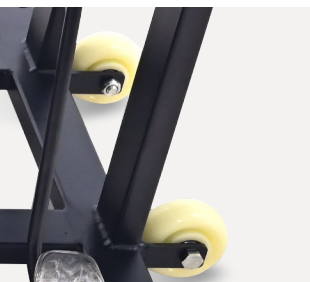

Foot pedal

The foot pedal adjusts the drop function, and the pressure massage can relax the tense and numb muscles of the thighs and buttocks, providing you with a relaxing and comfortable experience that revitalizes you.

Casters

The bed frame is equipped with two casters. By lifting the headrest, the head of the bed is elevated, allowing the rear caster wheels to be in an active state (as shown in the picture), making it easy to move the bed to the desired position.

Foot pads

Anti-slip foot pads, which are silent, non-slip, wear-resistant, and do not damage the floor.

Headrest up and down

The headrest is adjusted by a gas rod, with a handle for up and down adjustment. Additionally, there is a control lever on the right side of the headrest that allows for adjusting the tilt angle of the headrest, with a range of approximately 0° to 45°.

Adjustable headrest width

The width of the headrest can be adjusted. By turning the black knob directly below, the width of the headrest can be adjusted to accommodate different face shapes. The adjustable width range is 6 cm.

Armrest

The armrest is a fixed bracket, designed to fit the natural downward position of the arms, providing comfort and relaxation. Load capacity: 15 kg. The dimension of the armrest: L36 cm * W11 cm * H5 cm.

Three-section drop function

The thoracic, lumbar, pelvic, and knee regions each have three independent pressure zones. By pressing the foot pedal, the bed surface can be lifted, and applying force on the bed surface activates the drop function. Rotate the knob can control the pressure level.

Extended Ankle Cushion

To accommodate users of different heights, the extended ankle cushion features a retractable design. It can be extended up to a maximum of 15 cm. There are two fixed knobs on each side of the bed that can be used to secure the extended length.
