SKP040

FULL-AREA
PRESSURE-RELIEF
MATTRESS

- Ideal in ICU and special wards.
- Can meet various postures requirements, prevent pressure ulcers.

SAIKANG / Medical®

Healthier
your life

CORE

Reduce shear forces.

An innovative glide mechanism helps to reduce shear forces when used with an adjustable electric bed.

To achieve more refined care for bony prominence areas (head, shoulders, arms, elbows, feet), the sponges are grooved with different sizes and depths.

To better adapt to the changes of the bed frame, the edge sponges are grooved into a large recess shape, which makes mattress repositioning more convenient.

Dual-layer foam

Different densities, cube design, superior resiliency, strong support, effective pressure ulcer prevention.

Top Layer

28kg/m³, cube foam for optimal weight absorption, pressure redistribution and pressure ulcer prevention.

Bottom Layer and Edges

30kg/m³ high-density foam, providing extra edge support, enhanced edge stability during patient ingress and egress.

COVER

- Improve Clinical Outcomes

Excellent pressure redistribution aids in wound prevention.

- Reduce Risk of Injury

Standard safety features reduce fall risk and promote mobility.

- Reduce Financial Burden

Broad and diverse portfolio designed for quality and durability.

- Clinically Proven

Excellent pressure redistribution and shear management as found in independent tests.

Safe zipper design, anti-leakage, easy disinfection.

PU material, waterproof and replaceable.

Easy to clean, can be disinfected with neutral detergent, low-chlorine disinfectant, or 75% alcohol, and dried at low temperatures.

Optional Colour: Blue or Grey

PRODUCT INFORMATION

Model	SKP040
Length	2000mm
Width	900mm
Height	customizable
Safe working load	200kg

MANIPULATION OF FOAM PROPERTIES

Open cell memory foam technology

Better Airflow: Open cell memory foam mattress has a more breathable structure that allows air to flow through the mattress, preventing heat buildup and making it more comfortable to sleep on.

Faster Recovery: Open cell memory foam mattress is designed to quickly recover its shape after being compressed, can provide more consistent support and pressure relief over time.

Surface Modification and Layering

Vary pattern, pattern size, pattern spacing and cutting depth to protect high-risk areas.

Zoned pressure redistribution with improved air circulation and maximized comfort.

PRESSURE MAP

The pressure mapping system provides knowledge about interface pressure between a person and the surface person is lying, using a measuring sheet comprised of individual measurement points.
